PROFESSIONAL SUMMARY

Computer Science graduate with practical experience building and deploying web applications using JavaScript, TypeScript, React, Next.js, Django, HTML, CSS, and REST APIs. Experienced in developing responsive user interfaces, integrating frontend applications with backend services, implementing authentication and role-based access control, and working with relational databases. Hands-on experience debugging applications, validating data, troubleshooting technical issues, and working with real users and production environments. Comfortable using Git/GitHub and modern development tools, with a strong interest in building reliable, maintainable software and learning unfamiliar systems quickly.

EXPERIENCE

JUNIOR WEB DEVELOPER

Talira Org. — Remote

2025 – Present

- Develop and deploy websites and web applications designed to solve practical, real-world problems.
- Build user-friendly and responsive interfaces with modern web development technologies.
- Translate requirements and ideas into functional web application features.
- Work with frontend technologies including React, Next.js, TypeScript, JavaScript, HTML, and CSS.
- Integrate web applications with backend services and APIs where required.
- Investigate application issues, debug problems, and implement fixes to improve reliability and usability.
- Participate in code reviews and team meetings, contributing to knowledge sharing and continuous improvement.
- Collaborate remotely with team members to develop, improve, and maintain web-based solutions.

ICT & Data Support attaché

National Council for Persons with Disabilities (NCPWD)

May 2023 to July 2023

Embu, Kenya

Achievements

- Completed the organisation's data entry backlog

Key Deliverables

- Assisted in system support, data handling, and validation across internal platforms.
- Supported troubleshooting of basic technical and system-related issues.
- Maintained accurate documentation and ensured data consistency.
- Gained experience working in a production environment with real users and constraints.
- Developed strong attention to detail and process discipline.

PROJECT EXPERIENCE

Disability Management System

Final Year Project – University of Embu

Technologies: Django, MySQL, React

- Designed and developed a web-based system to manage disability records and service workflows.
- Built backend logic using Django models, views, and authentication.
- Implemented CRUD operations, role-based access, and data validation rules.
- Performed manual testing and debugging to ensure system stability and accuracy.
- Worked with structured data, ensuring consistency, correctness, and reliability.
- Collaborated with users to refine features based on feedback and usability issues.

Junior Machine Learning Engineer

Gebeya inc. Remote

- Developed and deployed machine learning models to solve real world problems, improving prediction accuracy by 15%. Conducted data preprocessing and feature engineering on large datasets to enhance model performance.
- Participated in code reviews and team meetings, contributing to knowledge sharing and process improvements

EDUCATION

Bachelor of Science in Computer Science

❖ [University of Embu], [2020-2025]

Highschool KCSE

❖ [Lenana School], [2016-2019]

KEY SKILLS

• TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, Python, SQL
- Frontend: React, Next.js, HTML5, CSS3, Responsive Web Design
- Backend: Django, REST APIs
- Databases: MySQL, PostgreSQL, Relational Databases
- Development: Git, GitHub, VS Code, Linux
- Web Engineering: Component-Based Development, Forms, Authentication, Authorization, Role-Based Access Control, CRUD, Data Validation
- Debugging & Testing: Browser Developer Tools, Debugging, Manual Testing, Error Handling
- Deployment: Web Application Deployment, CI/CD Fundamentals

Soft Skills

- Strong learning ability and adaptability
- Detail-oriented with a QA mindset
- Comfortable debugging and testing systems
- Clear communicator in remote settings
- Motivated to grow in startup and product- driven environments

Digital Competencies

- Microsoft Office Suite (Word, Excel, PowerPoint)
- Network security: Kali Linux, firewalls, VPNs, IP filtering
- Endpoint protection & malware detection
- Access control & user account management
- Data backup, encryption & recovery tools
- Email security & phishing prevention
- Understanding of cybersecurity principles (CIA Triad)
